

Rudder - Bug #6840

Editing a rule category remove it from Git - rule categories disappear! (Ran rok ensues)

2015-06-26 15:36 - Fran ois ARMAND

Status: Released	
Priority: 1	
Assignee: Vincent MEMBR�	
Category: Web - Config management	
Target version: 2.10.16	
Pull Request: https://github.com/Normation/rudder/pull/894	Effort required:
Severity:	Priority:
User visibility:	
Description	
<p>When we edit a rule category with the little pen that appears on mouse over the category name, then the category XML file on /var/rudder/configuration-repository/ruleCategories is removed.</p> <p>The corresponding commit message is:</p> <pre>Move archive of node group category with ID 'aaab98ef-8d7d-4948-9213-13ed93df8ebf'</pre> <p>Of course, it's the first silent move that leads to Ragn�rok and a chess mate in one move: from that point, if the user use the archive -> restore [rules] -> from last commit; then the category disappear, and any rule that uses it will have a wonderful "ERROR" as a category name.</p> <p>This is bad, developpers !</p> <p>It was reproduce in 2.10 and 3.0.</p> <p>Procedure to restaure rule categories deleted during a restore:</p> <pre>\$ cd /var/rudder/configuration-repository # find candidate rule categories (deleted with a "move" message) \$ git log --diff-filter='D*' --grep="Move archive" --format=format:%H ruleCategories > /tmp/possible_categories.txt # find rule really moved and not deleted due to the bug \$ git log --diff-filter='A' --grep="Move archive" --format=format:%H ruleCategories > /tmp/real_move.txt # restore rule categories on the fs \$ for i in \$(grep -v -f /tmp/real_move.txt /tmp/possible_categories.txt); do git show --no-color \$i patch -p1 -R; done # add them back in git \$ git add ruleCategories/ \$ git commit -m "restore categories from bug"</pre> <p>And then, go to utilities -> archive, and "restore rules" from "latest git commit" in the dropdown list.</p>
