

Rudder - Bug #8210

rudder-slapd may break on upgrade when restarting on openVZ

2016-04-26 19:15 - Benoît PECCATTE

Status:	Released	
Priority:	N/A	
Assignee:	Jonathan CLARKE	
Category:	System integration	
Target version:	2.11.21	
Pull Request:	https://github.com/Normation/rudder-packages/pull/905	Effort required:
Severity:		Priority:
User visibility:		

Description

Happened on a debian with openvz.
During an upgrade of rudder-inventory-ldap a force-reload command is issued on the rudder-slapd service.
This command kills slapd then restarts it.
The restart is fast and the slapd socket is not properly released by the kernel.
A sleep must be done before restarting to let the kernel recycle the socket.
