

Rudder - Bug #8421

Invalidation of previous package state and of package status cache does not work on rpmPackageInstallation 5.0 5.1 6.0 6.1 7.0

2016-05-30 14:56 - Jonathan CLARKE

Status: Released	
Priority: N/A	
Assignee: Nicolas CHARLES	
Category: Techniques	
Target version: 2.11.22	
Pull Request: https://github.com/Normation/rudder-techniques/pull/960	Effort required:
Severity:	Priority:
User visibility:	
Description	
In version 5.0 of the technique, the result classes for the packages promise(s) were changed from:	
<pre>classes => class_trigger_rpm_retcodes("rpm_package_installed_\${index_rmpkg}", "rpm_package_install_failed_\${index_rmpkg}", "rpm_package_install_kept_\${index_rmpkg}", "\${rpm_package_check_interval}"),</pre>	
to	
<pre>classes => rudder_common_classes_persist("rpm_package_installation_\${index_rmpkg}", "\${rpm_package_check_interval}"),</pre>	
However, the code that resets classes at the beginning (in case of a promise update) still uses the old names:	
<pre>"rpm_kept_classes_purged_\${index_rmpkg}" string => "undefine", classes => cancel_all_classes("rpm_package_install_kept_\${index_rmpkg}");</pre>
