

Rudder - User story #9836

Deprecate API v5, v6 and v7, and remove API v2,3,4

2016-12-21 15:50 - François ARMAND

Status: Released	
Priority: 3	
Assignee: Vincent MEMBRÉ	
Category: API	
Target version: 4.1.0~beta2	
Pull Request: https://github.com/Normation/rudder/pull/1459	User visibility:
Suggestion strength:	Effort required:
Description API v5 (resp v6) is linked to Rudder 3.0 (resp 3.1). It can be deprecated in Rudder 4.1 because with a new would-be LTS, we deprecate API up-to previous LTS. We can also deprecate v7 because it is version n-2 and all API version are deprecated up to that version. We can also completely remove api v2, v3, and v4 because the are pre-3.1, so before previous LTS, so not supported anymore. This ticket is only about no more exposing the rudder/api/2,3,4/... version. Of course, endpoints added in these version are still accessible through higher version number or latest.
